

MOEEZ AHMED SHAH

Senior Game Developer and Project Lead | Unreal Engine 5 | Unity | Open-world and multiplayer systems

Karachi, Pakistan moeezshah2019@gmail.com +92 345 6179281 linkedin.com/in/moezz-shah-3670091b0
moeez-ahmed.github.io

Summary

Senior game developer and project lead with 5+ years building games and real-time worlds in Unreal Engine 5 and Unity, and 4+ years leading cross-functional teams. I architect open worlds on Lyra and Mass Entity, multiplayer on listen and dedicated servers, and conversational NPCs with NVIDIA ACE and LLM dialogue, while staying hands-on in the code.

Experience

Senior Game Developer and Project Lead, **DABBTECH** Jan 2026 – Present

Karachi, Pakistan | dabb.co | kandgames.com

- Led four titles end to end: hands-on development plus day-to-day technical guidance for developers and designers.
- **WAHM** (Unreal Engine 5): third-person action-stealth game in a long development cycle, with GASP motion-matched locomotion, authored traversal and a crowd-dense market.
- **KingdomLand** (Unreal Engine 5): 3D real estate world built from real Riyadh map data. Players buy, sell, rent, bid and build, synced across devices.
- **Kick Arena** (Unity): football penalty and goalkeeper game, live on Google Play.
- **Tamr Farm** (Unity): farming game.

Senior Game Developer, **Grand Gangsta City** Dec 2024 – Jan 2026

Pakistan, on-site

- Architected modular open-world gameplay on UE5 Lyra for crime, racing and mission mechanics across a large city.
- Integrated City Sample and Mass Entity for large-scale crowds with performance-conscious ECS design.
- Built procedural destruction, fracture and vehicle damage pipelines tuned for mid-range mobile devices.
- Integrated NVIDIA ACE for MetaHumans and LLM-backed dialogue for real-time, mission-aware conversational NPCs.
- Led multiplayer replication, economy and live ops, with backend integration for Google Play and the App Store.
- Optimised memory, world streaming, animation and physics for open-world scale and live service.

Tech: Unreal Engine 5, Lyra, City Sample, Mass Entity, C++, Blueprints

Core skills

Engines

Unreal Engine 5 (C++, Blueprints), Unity (C#)

Gameplay

Lyra, Gameplay Ability System, GASP and Motion Matching, Mass Entity, City Sample, World Partition

Multiplayer and backend

Replication, listen and dedicated servers, GameLift, Node.js, REST APIs, Azure

AI

NVIDIA ACE for MetaHumans, LLM and ChatGPT dialogue, GOAP, bots and bosses

Physics and performance

Procedural fracture, vehicle damage, world streaming, culling, memory and animation optimisation

Architecture

ECS, Observer pattern, MVC, Onion, server-client model, SDK design

Live ops and economy

In-app purchases, in-game economies, NFT marketplaces, store live ops

Platforms

PC (Steam, Epic), Android, iOS, WebGL, VR

Honours

Employee Spotlight of the Year

ePAGING Private Limited, July 2023

Experience, continued

Senior Game Developer, **Apes Planet Meta** May 2022 – Apr 2025
United Kingdom

- Senior developer on Apes Planet, a spatial-computing metaverse hub in Unreal Engine connecting developers and players.

Team Lead, Game Design and Development, **ePAGING** Jan 2022 – Nov 2024

Promoted from Unreal Game Developer (Jan 2022) to Senior Game Developer (Aug 2022) and Team Lead (Nov 2022)

- Led a cross-functional team of Unreal, Unity, blockchain and Node.js developers, designers, artists and QA.
- Lead architect of Apes Planet; built a creator SDK for user-generated content and external developers.
- Designed hybrid networking: the world on a listen server, mini-games on dedicated servers, plus region-specific servers.
- Built in-game economies: shops, currencies, a proprietary coin, an NFT marketplace and an in-game exchange.
- Integrated ChatGPT-driven NPCs and AI-assisted missions; built AI bots and boss encounters.
- Optimised Unreal levels with streaming and culling; set optimisation strategy across Unreal and Unity.
- Directed Unity titles Crazy Battle (PvP car combat) and BeeCasino (WebGL casino mini-games).
- Earlier in the role: replication, Tekken-style fighting, GameLift networking, RTSP and RTMP streaming, Sequencer cinematics.
- Worked with the CEO on fundraising, product direction and client negotiations.

Earlier roles, 2021–2022

- Game Developer (contract), **Lambda GameWorks**, Mar–Apr 2022: portal, bridge and puzzle mechanics for a 3D puzzle game.
- Software Engineer, **Bits Collision**, Nov 2021 – Apr 2022: VR cultural heritage simulation on stitched 360° video.
- .NET Developer, **Tecizeverything**, Sep 2021 – Feb 2022: REST APIs, Amazon MWS and payment integrations, Vue.js and .NET Core.
- Trainee Engineer, **Pakistan Navy NRD**I, Nov 2021 – Jan 2022: research-based software projects.
- Software Development Intern, **GAOTek Inc.**, Sep–Dec 2021: architecture, Scrum, testing and documentation.

Education

BE Computer Software Engineering
Bahria University, Karachi
2018 – 2022 | CGPA 3.8 / 4.0

Other projects

Caravan of the Sands
Unreal Engine 5 desert-fantasy game about camel breeding and Arabian folklore, in development

Metarebels TrustVerse
Metaverse built for TrustVibes

Arcade AI 3D
3D simulation driven by a neural network

Certifications

Introduction to Game Design
Epic Games, 2024

Mathematics for Computer Games Development using Unity
Udemy, 2024

Advanced AI for Games (GOAP)
Holistic3D, 2021

Unity's ECS Optimization System
Holistic3D, 2021

Data Science Foundations and Python for Data Science
IBM, 2021

Creating Virtual Reality Apps
UC San Diego, 2019

Registered Software Engineer
